

Clean-BioMax is a microbial food source. When incorporated into the soil Clean-BioMax feeds existing/native microbes leading to increased biological activity, increased nutrient cycling and nutrient availability. Clean-BioMax can be applied at any time during the growing season.

Directions for Commercial Use:

Ground apply Clean-BioMax at a rate of 1 to 2 quarts per acre. Clean-BioMax can be ground applied or injected through most irrigation systems including drip and center pivots. If ground applying, ensure that Clean-BioMax is incorporated into the soil within two weeks after application, either mechanically or with sufficient water to wet soil to a depth of 1 inch. Clean-BioMax is intended to supplement and enhance a full ground fertility program as recommended in accordance with a reliable soil analysis.

APPLICATION PRECAUTIONS: If you have any questions regarding mixing or application rates contact your Agro-K dealer before using this product. Clean-BioMax can be mixed with most fertilizers and pesticides. A compatibility check is recommended.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>
